CCBC Low-fluoro Glide Waxing Protocol

Purpose

Cross Country BC respectfully requests all coaches, athletes, wax technicians and parents to abide by a self-governed protocol while waxing skis for identified races taking place in British Columbia. This also applies to coaches, athletes, wax technicians and parents traveling to British Columbia from out-of-province or out-of-country.

This protocol does not extend to national-level events held in British Columbia (e.g., NorAms and Western Canadian Championships). Waxing restrictions at those events (if any) are determined by the race organizers in consultation with Cross Country Canada.

Low-fluoro glide waxing protocol:

- Structure tools ARE permitted.
- Non-Fluoro (NF) or Low Fluoro (LF) glide waxes ARE permitted.
- Medium Fluoro (MF) or High Fluoro (HF) glide waxes are NOT permitted.
- Pure Fluoro glide waxes (powders, pucks, blocks and liquids) are NOT permitted.
- Cold weather powder additives and hardeners are NOT permitted.

Notes

1) If an athlete chooses to "race up" and compete in a different age category, the athlete is governed by the low-fluoro protocol in place for the category into which he/she races up.

2) For BC Winter Games Trials, whether the race is a stand-alone trials or part of a bigger event, the low-fluoro protocol must as a minimum include athletes in the Juvenile and younger categories.

Adherence to this protocol is self-governed and is the responsibility of coaches, athletes, parents and wax technicians.

Implementation date: January 1, 2017.
