K9 Trails

K9 Ski Trail

3km. Start across from parking lot. The trail should only be skied clockwise. There is a fairly steep uphill at start, gradual downhill in last half

Snow Shoe Main Trail

3.3km. More Difficult. Can be snowshoed in either direction. If going counter clock wise, the trail winds through forest and sometimes follows abandoned skidder trails. At the half way point, it climbs to the ridge between the ski trail and returns downhill to the beginning.

Snow Shoe Short Cut

0.2km. Easy. The short cut eliminates significant distance and difficulty. Starting on main trail and doing this short cut is 1.4km.

Snow Shoe Red Alder

2.2km. Most Difficult. Red Alder trail starts at .6 Km. on the main trail if going counter clock wise or 1.5 KM. If going clockwise, total distance is 4.3 KM. The trail is similar in difficulty to the main trail except for a steep uphill near the end when going counter clock wise.

Snow Shoe Ridgeview Trail

1.9 km. Most Difficult. A stout climb but the views are worth it. Best way is to take the main snow shoe trail clockwise and turn left on Ridgeview. Total distance is 3.4km.
